

TECHNICAL DATA

ANTIFREEZE STANDARD BLUE

Monoethylene glycol based antifreeze

Product code: OLFBL

Product Description:

ANTIFREEZE STANDARD BLUE is a universal engine coolant, suitable for all year round usage.

ANTIFREEZE STANDARD BLUE is blended using pure monoethylene glycol, anti-corrosion additives and inhibitors. It has been specially formulated to be truly universal in its application. It provides a high degree of corrosion protection for all engine cooling systems whether they are predominantly of aluminium or ferrous construction. ANTIFREEZE STANDARD BLUE employs established inhibitor technology and is nitrite, amine and phosphate (NAP) free and includes borate and silicate.

ANTIFREEZE STANDARD BLUE contains a bittering agent to prevent accidental consumption.

Application:

ANTIFREEZE STANDARD BLUE is suitable for all year round usage in automotive and commercial petrol and diesel engines and certain industrial applications.

Recommended Dilutions:

ANTIFREEZE STANDARD BLUE can be used as supplied, or further diluted in accordance with the table below.

Concentration (by volume)	50%	80%	100%
Freeze Protection (°C)*	- 20	- 38	- 56

*Average of freezing point and pour point.

Product Specification:

ANTIFREEZE STANDARD BLUE meets or exceeds the requirements of the following European & international standards:

ASTM D 3306, ASTM D 4985
SAE J 1034
BS 6580: 2010
